

BMFA Electric Indoor Masters Freestyle

The Freestyle event is primarily about spectator entertainment with the emphasis on pilot ability demonstrating new, extreme and daring manoeuvres.

Flights shall be two minutes long.

Music will be chosen randomly by the pilot immediately prior to the flight from a pre-determined list of tracks selected by the contest organisers.

Model specifications shall be the same as those specified for F3P-AM.

The competition will be based on head to head flights with the audience selecting the winner by a majority vote. The exact format will depend on the number of entries but is likely to consist of heats, semi-final and final.

At no time must the model cross the safety line. This will result in an immediate termination of the flight.
